

I. Core Strategy

- Flat monthly pricing (\$149–\$299), positioned as revenue-generating system
- Goal: clinic breaks even with ~3–5 patients

II. Core Product (MVP)

- Patient management (conditions, meds, eligibility)
- Messaging system (24/7 async compliance)
- Activity + light time tracking
- Revenue dashboard (billable patients + estimates)

III. Compliance Layer

- Care plans (auto-generated + editable)
- Documentation engine (audit logs)
- Consent tracking (CCM + data)
- Electronic patient record (basic EHR data)

IV. Differentiation

- Condition/medication logic engine ('basket system')
- Risk & alert dashboard
- Patient summary view

V. Expansion Modules

- TCM (post-discharge tracking)
- RPM Lite (self-reported vitals)
- AWV assistant
- CHI (social determinants)
- PIN (care navigation)

VI. Future Layer

- APCM (no time tracking model)
- Aggregated data insights (pharma/research)
